MAGILL & COMPANY
FARGO, NORTH DAKOTA

FARGO SEED HOUSE

MAGILL & CO. **January 15, 1916** *FARGO, N. D.*

1916 PRICE LIST 1916

In presenting this, the first issue for 1916, of our **Field Seed** and **Seed Grain** price list, we wish to take the opportunity to thank all our old friends and customers for their past patronage. We continue to grow, and our largely increased facilities enable us to handle the additional volume of business with the same careful attention that has distinguished **"Fargo Seed House Service"** in the past. We therefore welcome new trade connections, as well as increased favors from old customers. We beg to assure both old friends and new that our constant aim shall be to deserve your confidence by maintaining our present high standard of efficiency as to **quality** and **service.**

Our old customers are well acquainted with our standards of quality and methods of doing business, but to our new and prospective customers we want to say that, since our firm was first organized it has been our one great ambition to promote the interests of Agriculture throughout the Northwest and to offer only such varieties of seeds as we know will do well and are best adapted to our climatic conditions.

We have labored incessantly to help produce and offer to the trade improved varieties of seed grain, grass seeds and seed corn, and we do feel that these new varieties together with the general high standard of quality which we know is represented in every shipment which we make, have been in a large degree reflected in the present prosperous condition of the Northwest.

We have been in the seed business for 29 years and have built up our large volume of business through the reputation which follows the furnishing of GOOD SEEDS.

Samples.—We furnish samples of our seed grain and field seeds, free of charge, to prospective buyers on request. When orders are placed from samples please give us approximate date you received the sample; also stock number.

The North Dakota Seed Law is one of the most strict of any in the United States, and as we are located here at Fargo under the very shadow of the State Control Seed Laboratories, our stocks are at all times subject to the most rigid inspection and it is our ambition that every shipment be of even higher quality than that prescribed by our State Pure Seed Law.

No Warranty.—We exercise extreme care in the filling of all orders, but we give no warranty, expressed or implied, as to quality, description, or productiveness, or any other matter of any seeds we send out, and will in no way be responsible for the crop.

This non-warranty is similar to that used by all seed houses and we recommend that you test all seeds on arrival and if they do not meet your requirements return them at once at our expense and we will cheerfully refund your money.

Order Early.—As market conditions are very unsettled this season, and as fancy stocks are going to be hard to replace, we strongly recommend that our customers place their orders early, thereby taking advantage of the low prices which we present in this, the first issue of our 1916 price list.

Prices Subject to Change.—The prices quoted herein are based on market conditions at time this list is printed and are subject to change without notice.

We do not alter prices except in extreme cases, but if your list is an old one and you have occasion to presume that prices are either higher or lower, just write us for current list before ordering and we will supply one at once.

Terms of Sale.—Cash must accompany order and should be in the form of money order or bank draft, or currency by registered mail. We will accept postage on remittances of $1.00 or less if you find it more convenient to use this method.

Orders Promptly Filled.—But in case of delay you will be notified by letter explaining cause of such delay and advising when shipment will be made.

If you do not hear from an order sent us, within a reasonable length of time, send us a duplicate stating amount of remittance and be sure to give your name and full address.

Send for our booklets on Marquis Wheat, Alfalfa, Clover and Bean Culture in North Dakota; they are free, and may help you to get started right.

We also have a limited supply of **Farmer's Record** and **Account Books** which are particularly adapted for the use of small farmers wishing to keep records of their year's transactions. The book also contains many useful bits of information which will prove of value to every farmer. Send for one; they are free.

Remember we are the largest shippers of poultry Feeds and Supplies in the Northwest; heavy stocks always on hand for immediate shipment. Ask for special prices on ton lots.

HOME GROWN SEED CORN.

This is a year when Corn Growers should be extremely careful in selecting their seed, especially if they wish to secure a crop of matured ear corn next fall.

On account of the unfavorable weather conditions the past summer and fall the Northern Grown corn crop did not reach its usual high state of maturity and we had extreme difficulty in procuring a supply of North Dakota grown seed which could be cured for seed purposes.

We did succeed, however, in saving a few fields that we considered the very best produced in the State. Even the best of it carried an excess of moisture and had to be sorted with extreme care, which made a very heavy shrinkage, thus making the cost of producing the finished product much higher than usual.

In addition to this our supply is limited and dealers all over the country know it, so in consequence large quantities of Southern Grown seed corn are being offered for sale in North Dakota and Montana this year, which were grown so far south that it cannot possibly mature here even in the most favorable season.

Don't be fooled by this Southern seed. It surely looks larger, plumper and brighter than the North Dakota grown seed saved from the past season's crop but you know from your own observation that our North Dakota grown seed corn will produce a mature crop while the Southern grown seed will make only green fodder with a few soft ears.

Grading.—The bulk of our Home Grown Seed Corn is grown by us on contract from seed of our own selection.

All corn is first sorted at husking time, then a more careful selection is made when the ear corn goes to the driers and once again when on the way from the driers to the shellers.

In order that the seed corn which is marketed n shelled condition will make an even sowing in the average corn planter, we find it advisable to again run the corn over a grader after shelling, thus eliminating practically all small and irregularly shaped kernels which includes the major portion of the butts and tips.

Testing.—All lots of seed corn are tested for germination even before the drying process commences and we continue these tests at stated intervals up to and including the time of delivery.

Don't Be Deceived by the claims of Southern and Eastern dealers that our North Dakota corn is not fit for seed.

We have worked on this problem now for 18 years and have demonstrated that our Home Grown Corn can be dried artificially so that it makes seed of the strongest vitality every season.

Try our **"Fargo Brand"** Seed Corn this year and be convinced. When shelled it comes put up in seamless bags for which we make an extra charge sufficient to cover actual cost.

NORTH DAKOTA GROWN CORN.

Northwestern Dent.—An 85-day Red Dent Corn, with medium kernels and average sized cob. Has a fine leafy stalk, with ears well up from the ground so it can be cut with binder. The earliest Dent Corn grown, and we recommend it for any part of the Northwest. Grown in Cass County, N. D.
Shelled, per bushel **$5.00**

Northwestern Dent, Improved.—A new variety bred up from Northwestern Dent. Distinctive features being larger ears and taller stalks. Especially recommended for Central North Dakota. Grown in Richland County.
Shelled, per bushel **$6.00**

Golden Dent.—The earliest Yellow Dent in the world. Ears grow well up. In demand with feeders for early fall finishing of cattle. Grown in Cass Co., North Dakota.
Shelled, per bushel **$5.00**

Minnesota No. 13.—A Yellow Dent Corn very productive and adapted for all soil conditions. Stalks grow well up, leafy, and make a fine fodder. Matures in ninety days. Raised in Richland Co., N. D.
Shelled, per bushel **$5.00**

Minnesota No. 23.—An 85-day white cap Yellow Dent with shapely ears well filled to tip and butt, especially adapted for North Dakota conditions. Grown in Sargent Co.
Shelled, per bushel **$5.00**

North Dakota White Dent.—A very early variety raised in Richland County, N. D.
Shelled, per bushel **$4.50**

Squaw Flint.—Pure white, very early. Stalks short and ears growing close to ground, of high value to hog raisers. Grown in Sargent County, North Dakota.
Shelled, per bushel **$4.00**

Gehu Flint.—Yellow, short stalk, extra early. Grown in Cass County, North Dakota.
Shelled, per bushel **$4.00**

Mercer Flint.—Very early Flint Corn, twelve row medium sized ear. Grown in Cass Co., North Dakota.
Shelled, per bushel **$4.00**

Seamless Bags Extra, 20c Each.

MINNESOTA GROWN CORN.

1914 Crop.

We were extremely fortunate in being able to procure during the past summer a supply of very choice quality early maturing varieties of Central Minnesota Grown Seed Corn, from the 1914 crop.

This corn has been very carefully selected and housed and shows a good strong germination. The varieties selected we believe, are the very earliest grown in Minnesota, and as there is an apparent shortage in North Dakota grown seed corn we are going to recommend this stock to our customers in Northern South Dakota and South Central North Dakota, but in recommending it to your use we want you to remember it must be planted early and given the very best of care during the coming season.

Minnesota No. 13.—The parent stock of this seed was propagated at the Minnesota Experiment Station and the grower has endeavored to retain the earliness and type by a constant, careful selection of seed stock. On a normal season this stock will mature in 90 days, and there is no variety which will produce a heavier yield. Grown in Swift Co.
Shelled, per bushel $4.00

Longfellow Yellow Dent.—Similar to Minnesota 13 in appearance, and we consider it an ideal variety for Southern and Central North Dakota, especially for ensilage purposes. Ears are large and well formed, the kernel is deep and germ large, and the color as near pure as any variety of yellow corn of equal earliness. Grown in Swift County.
Shelled, per bushel $3.50

Rustler White Dent.—Shelled, per bushel..... $4.00
Grown in Lyon County.

Mixed White and Yellow Dent.—Shelled, per bushel..... $3.00
Grown in Traverse County.

Northwestern Dent.—Shelled, per bushel..... $4.50
Grown in Swift County.

Pride of North.—A Yellow Dent, deep grain, small cob and heavy yielder. Well adapted for feeding to stock in bundles without husking. South Dakota grown.
Shelled, per bushel..... $3.00

Square Deal Dent.—A very early Yellow Dent, heavy yielding variety, which has been grown successfully in North Dakota and Montana for years. This season's stock was raised in Eastern Montana and is choice quality. Shelled, per bushel..... $4.00

Pop Corn—White Rice.—Per bushel..... $3.50

ALL PRICES F. O. B. FARGO OR MOORHEAD.

FODDER CORN—ALL SOUTHERN GROWN.

The sowing of fodder corn has become almost universal as it provides an excellent forage crop, producing more tons of feed per acre than any other grain or grass. Can be sown late in the season when other forage crops are a failure. The varieties which we offer below are especially adapted for Northwestern conditions. Our present stock was purchased early in the season and is from the 1914 crop, showing choice quality and strong germination. Order early if you want some of this extra choice seed.

Nebraska Flint.—This stock is grown in Northern Nebraska and makes an early maturing fodder with soft ears, of excpetional value for silage purposes.
Shelled, per bushel.....$2.50

Mammoth Early Yellow Dent Fodder, makes heavy tonnage of excellent quality fodder—high in food value.
Per bushel.....$1.10

Mammoth Early White Dent Fodder, produces results similar to the yellow fodder variety, very leafy and easy to harvest.
Per bushel.....$1.10

Sweet Fodder Corn.—Produces abundance of choice quality fodder which is high in sugar content, of especial value for feeding to dairy stock. Per bu. of 45 lbs.....$2.00

Sugar Cane.—Makes one of the very best crops of fodder when drilled with ordinary grain drill at rate of 50 lbs. to acre; produces sweet, tender fodder, which is of high food value for cattle, horses and hogs. Every Northwestern farmer should grow some.
Per bushel of 50 lbs.....$1.25

Kaffir Corn is constantly growing in favor with our Northern farmers. When drilled in rows produces abundance of hay from 5 to 6 feet in height with broad leaves. Easily grown and makes one of the best fodders for horses and cattle. Per bushel of 50 lbs.....$1.25

Sudan Grass.—A new annual forage crop of immense value to the west. It resembles Sugar Cane, but grows a finer stalk, and reaches a height of 7 to 9 feet. Sow 4 to 6 pounds of seed per acre in rows 18 to 24 inches apart or drill 15 pounds per acre.
Per pound.....$0.15

Seamless Bags Extra, 20c Each.

SEED GRAIN.

Blue Stem Wheat, Minn. No. 169.—Plump, heavy wheat. Per bushel.....$1.40

Marquis Wheat.—A new variety of hard spring wheat which was originated by Dr. Saunders of the Central Experiment Station at Ottawa by crossing the Red Fife with acclimated Calcutta Red, thereby combining the early maturing features of the former and exceptional qualities and appearance of the latter. The seed which we are offering is from the original stock imported from the Canadian Northwest, beardless, heavy yielding, earliest maturing variety of hard wheat known.
Per bushel.....$1.40

Velvet Chaff Wheat.—A very early, large yielding variety of bearded wheat, average yield 25 bushels per acre. It ripens one week earlier than Fife or Blue Stem and is harvested and out of the way of rust and hot weather which so often injures the other wheats. Per bushel.....$1.40

Macaroni or Durum Wheat.—Choice selected seed. Per bushel.....$1.40

Scotch Fife Wheat.—Choice seed raised on new land in North Dakota. Weighs 60 lbs. per bu. Per bushel.....$1.40

60-Day Oats.—The very earliest oat we have been able to produce. Sow early for best results. Per bushel.....$0.60

Sensation Oats.—A remarkably heavy yielding oat if planted early. Fine quality and very early. Per bushel.....$0.55

Swedish Select Oats.—A new, very popular, early variety, heavy yielder under all soil conditions. Per bushel.....$0.60

White Russian Oats.—A late side oat, very free from rust. Per bushel.....$0.55

Big Four Oats.—Heavy branching, good yielder. Per bushel.....$0.55

Silver Mine Oats.—Early, heavy yielding. Per bushel.....$0.55

Giant Canadian Oats.—Early, heavy yielding Canadian grown. Per bushel.....$0.60

ALL PRICES F. O. B. FARGO OR MOORHEAD.

Oderbrucker Barley.—A new extra choice brewing barley, perfectly pure, six row, stiff straw, very heavy yielder. Per bushel.....$0.90

Manshury Barley.—Choice, bright, heavy yielding, six row barley. Per bushel.....$0.80

Wisconsin No. 5 Barley.—Best 6-row barley produced at Wisconsin Experiment Station. Noted for its plumpness and uniformity of grain, stiffness of straw and vigorous growth. Per bushel.....$0.85

Henschen 2-Row Barley.—Popular variety propagated at the State Experiment Station, heavy yielding. Per bushel.....$0.85

Hulless Barley.—This variety of barley is very popular with stockmen as it is both beardless and hulless. Weighs 60 pounds per measured bushel and is an enormous yielder; straw makes excellent hay. Per bushel.....$1.15

Beardless Barley.—The earliest maturing variety known; of especial value to feeders as both grain and straw are of high feeding value. Per bushel.....$1.10

Primost Flax No. 25.—One of the best varieties produced by Minn. Exp. Station and is pronounced by this same authority as the heaviest yielding variety which they have been able to produce. Per bushel.....$2.65

Pure Russian Flax.—Choice seed raised on new land. Per bushel.....$2.60

N. D. No. 155 Flax.—It is a hardy, good yielding strain. Its strong points are its capacity for yield and grade. It has also shown good resistance in recent years to the wilt disease. It is a variety of moderate height, and heavily loaded with well filled bolls which present a very level surface as the crop grows in the field, thus making a nice appearance and a good yield of seed. Per bushel.....$2.75

North Dakota Resistant No. 52 Flax.—This variety was bred up by Prof. H. L. Bolley of the N. D. Experiment Station for a Wilt Resistant variety. He commenced work on it in 1900 and first put the seed in farmer's hands, in small quantities, in 1908. This is the fifth year we have been able to secure any of it to offer to our customers and the supply is limited. Per bushel.....$2.75

Seamless Bags Extra, 20c Each.

Speltz.—Farmers in the Northwest cannot afford to be without it. It produces a good yield under adverse circumstances, where other crops would fail. It will stand more dry weather than any other grain crop, as it is a great drouth resister. It produces more food value per acre than any other of our grains and is a most valuable feed for all kinds of stock. The plant is almost entirely free from rust and smut and does not lodge. Per bushel.....$0.75

Spring Rye.—North Dakota grown stock of good quality. Per bushel.....$1.25

Winter Rye.—Makes excellent pasture if sown in spring. Per bushel.....$1.15

Buckwheat.—Can be seeded very late and is of great value as a catch crop as it is often sowed in July; highly recommended to turn under when green; it smothers weeds and is fine for fertilizer. Per bushel of 42 lbs.....$1.25

Hog Pasture Mixture.—This mixture is made after a formula furnished by Government Experiment Station; produces abundance of highly nutritious pasturage. Per 100 lbs.....$5.00

Dwarf Essex Rape.—Furnishes an immense amount of green feed, and its nutritive value is nearly twice that of clover. It may be sown any time from early spring until late in summer, with grain or alone. From 5 to 10 lbs. of seed per acre is sufficient, less if sown with grain. We buy in car lots and handle only the best and purest Dwarf Essex, entirely free from bird rape, mustard, or other noxious weed seeds. The Dwarf Essex is the only desirable variety. Per 100 lbs.....$8.00

Canada Field Peas.—Make excellent feed for horses, sheep, hogs and milch cows; equal to corn and a month earlier in maturity. Sow either alone or with oats and barley. Per bushel.....$3.25

Cow Peas.—If planted early in May produce heavy hay crop which can be cut and handled same as clover, then the stubble will put on a new growth which may be turned under as a soiling crop. Per bushel.....$3.75

Soy Beans.—Have a double value as they produce abundance of feed and are one of the best nitrogen gatherers, thus enriching the soil. Per bushel.....$3.75

Winter Vetch is one of our most valuable legumes which brings an immense amount of fertility to the soil and provides fine pasturage. Per 100 lbs.....$14.00

White Navy Beans.—Per bushel.....$4.50

ALL PRICES F. O. B. FARGO OR MOORHEAD.

POTATOES.

Early Ohio Potatoes.—Pure Stock. Hand sorted. Per bushel.....$0.85

Early Six Weeks Potatoes.—A very choice variety, much like the Early Ohio but earlier and more productive. Per bushel.....$0.90

Rural New Yorker Potatoes.—A heavy yielding white variety; hand sorted. Per bu.....$0.85

Irish Cobbler Potatoes.—Heavy yielder; in demand by Southern seed trade. Early and hand sorted. Per bushel.....$0.85

Charles Downing.—A new variety in the West which was introduced by S. A. Case, Ludden, N. D.; heaviest yielding white variety on which we have a record. Uniform in size and never scabs; fine flavor and we recommend them as fancy stock for table use; good keeper. Per bushel.....$1.00

Late Rose.—The genuine Late Rose still remains a standard variety. Heavy yielder, choice stock. Per bushel.....$0.80

MILLET.

Millets of all varieties should be sown in North Dakota after June 1st, for best results.

German Millet.—Home grown. Per 100 lbs $3.25

German Millet.—Southern. Per 100 lbs.....$3.50

Hungarian Millet.—Home grown, 100 lbs.....$3.25

Hungarian Millet.—Southern, per 100 lbs.....$3.50

Siberian Millet.—Home grown, per 100 lbs.....$2.75

Siberian Millet.—Southern, per 100 lbs.....$3.00

Kursk Millet.—A variety introduced in 1908 from Kursk, Russia. It is similar to Siberian. In dry years the yield of hay has been much heavier than other kinds. We can recommend it highly. Per 100 lbs.....$3.50

Early Fortune Millet.—Home grown. Per 100 lbs.....$2.75

Hog Millet.—Home grown. Per 100 lbs.....$2.75

Japanese Millet or Billion Dollar Grass.—Grows very rank and produces an immense yield of coarse hay. Per 100 lbs.....$6.00

Seamless Bags Extra, 20c Each.

GRASS SEED.

Bromus Inermis.—The great drouth resisting grass for both hay and pasture. Choice seed which we recommend as quack free. Per 100 lbs., sacked.....$9.00

Western Rye Grass.—(Proper name, Slender Wheat Grass.) Affords excellent pasture and provides large quantities of hay; will thrive under very dry conditions on light soil; also thrives in alkali soil where other grasses fail. Per 100 lbs., sacked.....$9.00

Timothy.—Choice North Dakota grown. Per 100 lbs.....$7.50

Timothy and Red Clover Mixed.—Choice Minnesota grown with sprinkling of Red Clover, just as grown together. Per 100 lbs $8.50

Timothy and Alsyke Clover Mixed.— Per 100 lbs.....$8.50

Blue Grass.—Choice Kentucky, per 100 lbs $13.00

Red Top.—Solid, good for low lands. Per 100 lbs.....$19.00

Orchard Grass.—Good for shade—100 lbs. $16.00

Lawn Grass Mixture.—Our Fargo Brand mixture contains the choicest varieties which are particularly adapted to our Northern climatic conditions. Per 100 lbs.....$21.00

Medium Red Clover.—Choice Minnesota grown. Per 100 lbs.....$22.00

Medium Red Clover, North Dakota Grown. This is a choice hardy lot of heavy dark colored clover grown in Cass County, which we recommend most highly for sowing here in North Dakota. Per 100 lbs.....$23.00

Mammoth Red Clover.—Minnesota grown. Per 100 lbs.....$22.00

Alsyke Clover.—Minn. grown. Per 100 lbs $20.00

White Clover.—Per 100 lbs.....$50.00

Sweet Clover.—(White Flowering, Mellilotus Alba.)—Valuable plant for both hay and pasture, also of high value as a soiling crop. Per 100 lbs.....$22.00

ALL PRICES F. O. B. FARGO OR MOORHEAD.

FARGO BRAND FANCY ALFALFA.

Alfalfa is rapidly becoming a necessary crop to every Northern farmer, and the production of seed here in the Northwest is increasing rapidly, as it is a recognized fact by all authorities that this Northern grown stock is preferable to that grown in the south central states or in Europe.

We are now handling carloads of this Northern grown seed each year, which, together with our geographic location, makes it possible for us to offer to our customers alfalfa of exceptional quality at a very reasonable price.

Alfalfa.—Montana. Grown on non-irrigated land and from some of the oldest and best established fields in the state. High in purity and stock which we can recommend to our trade. Per 100 lbs.....$25.00

Alfalfa.—American grown, in either Nebraska or Idaho. Shows strong germination and high purity. Some of the best fields in the Northwest have originated from this stock. Per 100 lbs.....$22.00

Alfalfa.—South Dakota. Grown out in the Black Hills district under dry farming conditions on old fields which have withstood many winters, so we can recommend this stock as being perfectly hardy and of highest purity. Per 100 lbs.....$22.00

Alfalfa—Grimm. Is characterized by spreading roots instead of one main tap root; it also has a much wider crown than other varieties and is noted for its heavy stooling tendency. On account of the peculiar root formation some authorities claim it efficiently withstands winter killing. Per lb.....$0.70

Turkestan Alfalfa.—A variety of Alfalfa which is imported. Per 100 lbs.....$22.00

SCARIFIED CLOVER AND ALFALFA SEED.

We have recently installed a scarifying machine for the treatment of Clover and Alfalfa seed containing a high percentage of what is known as "hard seed." The function of this machine is to crack and scratch the hard shell of the seed thus enabling it to more readily absorb moisture and grow the first season, when planted in the ground.

Seed tested by this process shows almost a perfect germination, and is supplied at $1.50 per 100 lbs. over and above the foregoing prices.

Nitrogerm.—For Clover and Alfalfa inoculation. First quality nitrogen-fixing bacteria which makes positive a good catch the first season. Write for special circular. Costs per acre.....$0.50

Seamless Bags Extra, 20c Each.

POULTRY SUPPLIES.

(No charge for sacks.)
